

A pixel art illustration of a city skyline at sunset. The sky is a gradient of orange and pink, with a large, bright sun setting behind the buildings. The city is composed of various skyscrapers and buildings in shades of pink, purple, and blue. Some windows are lit up with yellow and green light. The overall style is retro and digital.

The Problem & Market Opportunity

Problem Statement

- Productivity Struggles: Lack of accountability and declining motivation.
- Current Apps: No tangible incentives for consistent productivity.

Target Audience:

Primary:

- Students, working professionals, fitness enthusiasts.

Secondary:

- Teams and organizations seeking accountability.

Market Size:

- **Global Market:** \$42B in 2021, projected to grow to \$56B by 2027 (5.5% CAGR).
- **Serviceable Market:** 200M+ users worldwide (students, professionals, fitness).
- **Revenue Opportunity:** 1%-2% penetration = \$5M-\$20M in annual revenue in 3 years.

Innovative Solution

Solution Overview:

- **ReName:** A suite of apps to help individuals get back on track.
- **ReClaim:** A mobile app that makes productivity rewarding by integrating monetary accountability and goal-setting gamification.
- **How it works:** Users invest money into their goals (e.g., studying, working out). They either reclaim it upon success or lose it if they fail.
- **Premium Features:** Group goal tracking for social accountability, allowing friends or teams to collaborate and compete.

Unique Selling Point (USP):

- **Monetary Motivation**
- **Scalable Ecosystem**
- **Community Features**
- **Gamification**

Traction/Prototype:

- **Current Stage:** In development; app completion expected by end of March.
- **Expected Traction**
 - **Projected beta users:** 500+ within the first month (via Reddit, Product Hunt, and college communities).
 - **Early feedback:** Many respondents (domestic & international) expressed interest in monetized productivity solutions

Revenue Model & Go-To-Market Plan

Revenue Streams:

- **Unclaimed Goal Money:** When users fail, their invested money stays with the app, contributing to revenue.
- **Premium Subscription Fees:** Paid features like enhanced goal tracking, advanced analytics, and group challenges.
- **Advertisements:** Ads in the free version generate revenue from non-paying users.
- **Group Pot Fees :** Small fee (0.1%-1%) on group challenge pots post-trial.
- **Dynamic Pricing:** Regional pricing adjusts to global markets for higher revenues in developed regions.

App UI prototype on Figma

Marketing Strategy:

- Digital Ads.
- Reddit Subreddits
- Product Hunt Platform
- Influencer Partnerships
- Campus Campaigns
- Referral Programs

Scalability:

Within 6 Months:

- Grow user base with targeted marketing.
- Increase premium subscriptions.
- Expand to cross-platform integration (fitness trackers, calendars).

Within 12-18 Months:

- Launch additional apps (e.g., RePomodoro, ReTime) targeting new niches.
- Partner with corporates and educational institutions for large group challenges.
- Global Expansion: Tailor marketing strategies for new regions based on local needs

Business Model Canvas

Cost Structure		Revenue Source	
Development and maintenance, Marketing and promotions, Server and platform costs, Salaries for team members.		Unclaimed goal money, Premium subscriptions, Ads in the free version, Group pot fees (e.g., 1%), Dynamic pricing by region.	

SWOT Analysis

Strengths

- Monetary Motivation
- Group Accountability
- Advanced Verification
- All in one app
- Gamification
- Scalable Ecosystem

Weaknesses

- Honesty Reliance
- Monetization Challenge
- Trust Barrier

Opportunities

- Institutional Partnerships
- Social Impact
- Premium Features

Threat

- Similar apps
- Regulatory Issues
- User Retention

Ask & Impact

Funding Ask:

- **Amount:** ₹4 Lakhs for 2.5% equity in seed funding.
- **Use of Funds:**
 - Product Development
 - Marketing & User Acquisition
 - Team Expansion

Impact:

- **Revenue Goal:** \$1.5M in revenue within 2 years (premium subscriptions, ads, goal-related fees).
- **User Growth:** 500K active users across productivity niches (students, professionals, fitness).
- **Scalability:** Expand into 5+ regions, tailoring the app for local markets and building a global user base.
